

# Kameleon

Empower and Socialize

Enable children in their personal development, maximize independence, and social integration.

## Empower and Socialize

4 positioning functions and biomechanical design. 2 seat sizes, fully adjustable to provide stability, alignment, and comfort all day.

Front-wheel drive power base with narrow wheelbase which allows agile maneuverability. 4-wheel suspension system and chassis design promises a stable and safe ride, whether moving around at home or having fun at the playground.

Adjustability plays a key role in children's wheelchairs. The Kameleon offers 10-12 inches adjustments of the seat width and 11-14 inches of the depth.

## Growing Up with Kameleon

### Two seat sizes, 85% growing range

Designed to grow with the user from 3 to 12 years old. Between the smallest and the biggest seat size, the growing range is 85%.

### Leon, adult seat compatible base

Easily transferable to an adult seating system, supporting the transition from child to young adult.

### Expandable seat

- Seat width and depth expandable.
- Backrest size expandable in height and width. Every back panel can be adjusted into a position that is best fitted to the child.

## The First Time of Mobility

Depending on the physical condition of the user, Kameleon must be able to accommodate other types of controllers:

### Side controls

VR2

Up to 2 power functions control

R-Net / JSM

Multi-power seat functions control

R-Net / CJSM

Multi-power seat functions control with LCD screen

Tray Table Control

Push buttons style

Toggle switches style

Switchbox Controls

Attendant Control

It is the only power wheelchair on the market to provide full power functions, including power tilt, recline, lift, and elevating legrest. It also offers a wide range of adjustments.

## 4 Positioning Functions

### Power lift

Easy to sit at a table and avoid body overstretching when the user tries to obtain objects from high shelves. Promotes equality and integration, maximizes self-confidence by allowing children to have eye-level interactions with their friends and adults.

### Power tilt

The power tilt enables the user to change their position by themselves and shift the weight from their buttocks to the back, maintaining a good posture. This feature also aids stability while driving downhill, making the ride safer and more comfortable.

### Power elevating legrests / Manual elevating legrests

Elevating legrests with biomechanical rotation joints, help the legs to stretch. The legrests are highly adjustable in length, knee angle, and footplate angle.

### Biomechanical manual recline

Recline function with optional shear reduction opens the angle between the seat and the back, allowing the user to rest and relax outside, and making diaper change easy.

The height, angle, and curvature of the headrest are adjustable and help ease the pressure on the head and shoulders. An additional rail can be added to increase the horizontal range of adjustment.

## Tailor Fit Positioning Support

### 3D head support:

Adjustable and expandable

The height, angle, and curvature of the headrest is adjustable to help ease the pressure on the head and neck. The size can be expanded by adding components.

### Lateral trunk supports:

Adjustable for easy transfer

Are adjustable in height, depth, angle, and distance between both supports. Allows the pads to match the body's contours, enhancing comfort and trunk support.

### 3D lateral pelvic & hip supports:

Adjustable and expandable

Easily added to the seat frame for additional positioning support. The pad's height, depth and, angle are adjustable, providing flexibility and security.

Indoor and outdoor, front-wheel drive Leon power base. The narrow wheelbase allows for agile maneuverability. It is geared for speed without compromising on stability or control.

## Ride Like a Leon

### Full 4-wheel suspension; safe and smooth

Comfort and smooth while moving around at home or heading out to the playground. Speed up to 12.5 km/hr, the strong motors can overcome the roughest terrains, keeping the child safe.

### Compact base, tight turning radius

620 mm wide base, moving effortlessly through the home, school doorways, into lifts, and around confined spaces. Perfect for keeping up with family and friends.

### Intuitive and confident front-wheel drive

Smooth transition over obstacles, providing strength and stability.

The abducted seating of the Kameleon was designed to help children to support their legs and remain in this natural sitting position.

## Sit Stable, Sit Right

### Supports children as parents do

Kameleon's backrest design philosophy is to represent three pairs of hands, shaped to perfectly support the curve of the user's back, a symbol of parents' care. Functionally can be adjustable into a position that best fits the child as they grow.

### Abducted seating design

Allows the user's legs to spread naturally, widening up the pelvic base of support and increasing the hip joint integration, for an adequate seating position.

### Customizable seat wedges

Customizable hard foam wedges create the perfect fit and seating support for special needs.

## Your Safety Matters

### Highest safety standard

Suitable to be used as a seat in a motor vehicle or school bus for transportation.

ISO 7167-19:2008 crash test, using 4-point tie down straps  
ISO 7167-19-2008 / 10542 WTORS, using Dahl docking station  
EN 12184 and ISO 7176 range of safety regulations

### Auto speed reduction

- Driving speed automatically reduced when the seat lift and tilt are activated.
- Driving function automatically blocked when the table control is flipped over.

### Maximum base stability

The chassis is design in the way to give maximum stability and safety.

### Front anti-tippers

Anti-tippers in the front provide a stable platform at every angle.

### Gyro technology

Helps to maintain direction and control when overcoming obstacles like thresholds, curbs, or any external forces.

### Impact-resistance tray table control

Polycarbonate material used on the center-mounted table control is durable and impact resistant.

## Specifications

### Seating System

	Size 1	Size 2
Effective Seat Width (mm)	250 ~ 300	350 ~ 400
Effective Seat Depth (mm)	275 ~ 410	330 ~ 470
Seat Surface Height at Front Edge (mm)	460	460
Backrest Height (mm)	420 ~ 600	500 ~ 680
Seat angle adjustment/ Power tilt (X°)	(-3) ~ 42	(-3) ~ 42
Seat height adjustment/ Power lift (mm)	460 ~ 760	460 ~ 760
Backrest angle adjustment/ Manual recline (X°)	(-3) ~ 48	(-3) ~ 48
Leg to seat angle adjustment/ Manual (X°)	89 ~ 172	89 ~ 172
Leg to seat angle adjustment/ Power (X°)	84 ~ 140	84 ~ 140

For more measurement information

### Driving Characteristics

Maximum user weight (kg)	57	Dynamic stability uphill (X°)	6
Overall width (mm)	620	Maximum speed forward (km)	6 ~ 12
Overall height (mm)	760 ~ 820	Energy consumption (km)	25.6 (50Ah) / 46.2 (80Ah)
Overall length with legrest (mm)	1090 ~ 1260	Obstacle climbing (mm)	50 (Max.)
Folded length (mm)	1010	Minimum turning radius without user (mm)	660
Folded width (mm)	620	Ground clearance (mm)	60
Folded height (mm)	760 ~ 820	Front / Rear wheel size	(F)3.00 - 8 , (R)280/250 - 4
Total mass (kg)	167 (50Ah) / 196 (80Ah)	<b>Electrical System</b>	
Total mass without batteries (kg)	136 ~ 142	Motor power (W)	450
Mass of the heaviest part (kg)	116	Battery capacity (Ah)	50 x 2pcs / 80 x 2pcs
		Battery Compartment (L x W x H) (mm)	345 x 260 x 220
